I do not like Bill Gates or Microsoft. They deserve what they got and more. I do not like how they walked over so many little companies or bought them out in the middle on law suits. One of those law suits happening right in Salt Lake City, Utah. They break copy rights and then buy themselves out of law suits. They deserve every bit of punishment given to them. Bill Gates should lose all his interest in Microsoft and it should be broken up in little tiny pieces. I urge you the supreme court of the United States to not review the case unless you are going to punish them bigger and better than the lower courts have done. Thank you for letting me express my view. James L. Thompson
